SUMMARY

Passionate Software Engineer and published Author ("Rust Web Development" - Manning). I have over 10 years of experience working in many roles (Tech Lead, Customer Facing, Systems Engineer, Frontend and Backend), in multiple companies (StartUps with 3-8 people, small businesses with around 50 people and large scale enterprise from 200 to 5.000 people). I organise community events (Rust and Tell Berlin, besides others). I am considered a great team player, and lover of software.

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Full-time
Centrifuge, Remote

August 2022 - now

Centrifuge works on equalising access to financial products. We create the opportunity to move pooling of funds for loans away from banks-only, and give the chance for small business to apply for loans through our protocol, and for more than one investor to invest in these loans. We use the Polkadot ecosystem to build our product as a base layer.

- Working in a self-managed organisation wearing different heads (Head of Documentation, Protocol Engineer)
- Writing specifications for upcoming features
- Contributing to the open source protocol with Rust
- Building out a runtime on top of Substrate
- Develop reusable deliverables for our in-house developers
- Setting up GitHub CI pipelines for documentation building

Sr. Solutions Architect (Professional Services) - Full-time
Twilio Inc., Remote

June 2020 - August 2022

Twilio just started to create their Professional Services team in EMEA and I was the second SA joining their team. The goal is to support and enable small to large scale customers using the Twilio APIs, help them integrate the services, do code reviews and review their architecture.

- Acted as the Technical Lead
- Involved in hiring and onboarding
- Creating architectural specifications
- Develop reusable deliverables for customers
- Leading customers through a technical solution
- Code reviews
- Setting up sales and feedback cycles

Author of "Rust Web Development"
Manning Publications, Remote

October 2020 - December 2022

Writing the book "Rust Web Development". Research, writing and marketing the book in partnership with Manning.

Systems Engineer - Contract

September 2019 - May 2020

Kraken Digital Currency Exchange, Remote (San Francisco)

Part of the first Rust team of the company, replacing the core trading engine with Rust. Worked alongside

12 highly experienced Software Developers from all over the world. Refactor code from PHP to Rust, wrote new features in Rust in a well-tested highly secure manner.

- Re-wrote several PHP services in Rust
- Built new features in Rust directly
- Developed programs to sustain several thousand requests a second

Software Engineer, Tech Lead
Scholarship, Enterprise, StartUp

September 2010 – August 2019

- Was the first employee in two companies, setting up infrastructure, processes and the tech stack
- Worked both as a freelance consultant and full time employee
- Guided teams through learning a new language and maintaining a new technology stack
- Integrated security related infrastructure for IoT companies
- Mentored and guided junior developers
